

AI IMPLEMENTATION CONSULTANCY

AI implementation, systems integration, and team enablement.

We help organizations deploy AI tools, connect them to business systems, and establish practical ways of working.

AI tool implementation

Get your team from licenses to everyday use.

- Use-case and tool selection
- Workspace and repository configuration
- Team onboarding and practical playbooks

Agent standards & governance

Give teams a consistent way to work with agents.

- Shared rules, skills, and agent configuration
- Access and approval design
- Evaluation, logging, and review practices

Workflow & system integration

Connect AI to the work you already do.

- System and data integration
- Custom MCP servers and tool connections
- Workflow implementation and evaluation

Enablement & ongoing support

Help people use it. Keep it useful.

- Workshops using your team's workflows
 - Documentation and ownership transfer
 - Scoped support and improvement plans
-

Engagement options

Assessment

Define the opportunity and a practical implementation scope.

Implementation

Deliver an agreed tool rollout, integration, or workflow.

Ongoing support

Maintain the implementation and improve it as needs change.

Principal-led delivery

Jim Weglin · Founder & principal implementation architect

Enterprise architecture and hands-on implementation across Salesforce, cloud systems, integrations, and AI tooling.
